TECHNICAL DATA SHEET

BLANKE AQUA-DEKO

The sleek profile for Blanke DIBA-LINE⁺ system

Characteristics

- > Adjustable to several covering heights
- > Easy to install

Description

BLANKE AQUA-DEKO is made of stainless steel and is for an elegant finish above of the linear drainage system while using floor-level showers.

Application area

BLANKE AQUA-DEKO avoids oblique cuts of tiles above of the linear drainage system BLANKE DIBA-LINE and provides a uniform appearance together with BLANKE AQUA-KEIL.

Working instructions

Install BLANKE AQUA-DEKO horizontally at the same height as BLANKE AQUA-KEIL WALL and Blanke•AQUA KEIL. The adjustment and bonding have to be done with tile adhesive. There must be a gap of ca. 1,5 mm to the contiguous row of tile above of the profile. The gap between profile and tiles has to be filled in completely with grout. For cleaning the stainless steel do not use any steel wool or steel brush. Thereby extraneous rust could occur. Any cleaning agents must not contain hydrochloric acid or chlorine.

Technical Data

Length: 1,25 m

Height: 24 mm
32 mm
40 mm

Installation height from 4,5 mm

Material: Stainless steel V2A brushed
Stainless steel V2A satin

Basic material (1.4301)
