## BLANKE ADJUSTABLE TRANSITION PROFILE

Due to an innovative design, the BLANKE ADJUSTABLE TRANSITION PROFILE can be used for transition from ceramic tile to any floor surface with a height difference of up to 1/2". The BLANKE ADJUSTABLE TRANSITION PROFILE is comprised of a rigid PVC base which is color coded to designate the corresponding tile height, and an aluminum cap profile which is inserted into the base after the adjoining floor surface has been installed. The aluminum transition arm is then pressed down to rest on the adjacent floor surface.

## BLANKE SELF-ADHESIVE TRANSITION PROFILE

The BLANKE SELF-ADHESIVE TRANSITION PROFILE is easy to apply and adheres to many different surface types including ceramic, wood, vinyl and commercial grade carpet. Because the BLANKE SELF-ADHESIVE TRANSITION PROFILE goes in after both adjoining surfaces are installed, it is ideal for renovations where the ceramic tile is already in place.
