

# BLANKE DRAIN-MAT

The BLANKE DRAIN-MAT provides a durable, prefabricated drain system to prevent the accumulation of moisture that can form hydrostatic pressure and damage floors. Moisture is allowed to seep down through water permeable fabric on top into channels formed between pillars in the system's high load bearing PVC base. The water drains by natural gravitational force to designated outlets. It reduces the potential for damage caused by water expansion in freeze/thaw conditions.

## BLANKE DRAIN-MAT

1 roll = 161.54 sq. ft.		Pack: 1 roll
width/length	Art. no.	\$/roll
3.28' × 49.25'	524-900	369.69

**Important note:**  
Particularly suitable for exterior use

- Advantages:**
- > Fast constant drainage
  - > Heat stable up to 176°F
  - > Durable plastic constructions prevents deterioration under tile installation
  - > Smooth plastic underside and lack of mechanical fasteners will not damage substrate waterproofing
  - > Superior compressive strength up to 4,102 lb./sq. ft.

- 1 Tile adhesive C2 S1
- 2 BLANKE BALCONY- GRAVEL DECK EDGE
- 3 BLANKE AQUA-SEAL
- 4 BLANKE AQUA-SHIELD
- 5 BLANKE DRAIN-MAT
- 6 Gravel
- 7 Tile
