Properties

BLANKE ECKBERT is a thin-layer shelf made of stainless steel with different geometries and design lines.

- > easy to clean
- > installation without drilling
- > retrofit possible

Product description

BLANKE ECKBERT is a useful corner shelf for your modern shower where shampoo and shower gel find their place. The corner shelf is made of sturdy stainless steel and is available in different geometrical shapes – providing tidiness in the shower. Different laser cut patterns and designs on the surface of the shelf help to prevent standing water, and make the tray easier to clean and maintain. The shelf can be inserted subsequently into the grout line without requiring any drilling.

Area of application

BLANKE ECKBERT can be installed into the tiled surface without drilling. The horizontal grout line between two tiles is used. Subsequent installation on existing wall coverings is also possible. Care products such as shampoo, shower gel etc. can be placed on the shelf. The corner shelves are also suitable in areas outside of bathrooms with tiled walls.

Installation

Insert the receiving latches into the grout line. For existing coverings, cut out the grout line beforehand. Seal the top and bottom edge of the tray with silicone.

Attention: The correct and thus successful use of our products is not subjected to our inspection. Liability can therefore only be accepted for the quality of our products within the framework of our terms of sales and delivery, but not for successful installation. This data sheet (01.01.2022) supersedes all previous technical data sheets for this product. We reserve the right to make changes which represent technical progress. Information provided by our employees which goes beyond the scope of this data sheet requires written confirmation.
